DESCRIPTORS: *Blast furnaces, *Cooling, Operation, Tests.

Ten years of experience with one furnace with slab (vertical) cooling plates and 2 years experience with another have shown that cast-iron slab cooling plates with recesses filled with bricks, the plates being placed along rational furnace contours, make it possible to get a better configuration of the furnace interior through a fundamental change of the furnace lines, involving a considerable increase of the height and diameter of the belly, and a considerable reduction of the height of the
